WeevilTrak Plus Annual Bluegrass Weevil Guarantee

WeevilTrakSM Plus now includes the latest innovation in turfgrass insect control, Atexzo[®] insecticide. A **new class of chemistry** for turf, Atexzo controls **adult annual bluegrass weevils (ABW)** and **all larval stages** through **contact** and **ingestion**, and provides additional control of billbugs. With the introduction of Atexzo, WeevilTrak Plus **guarantees** control of **ABW** as well as season-long control of **grubs** and **turf caterpillars**.

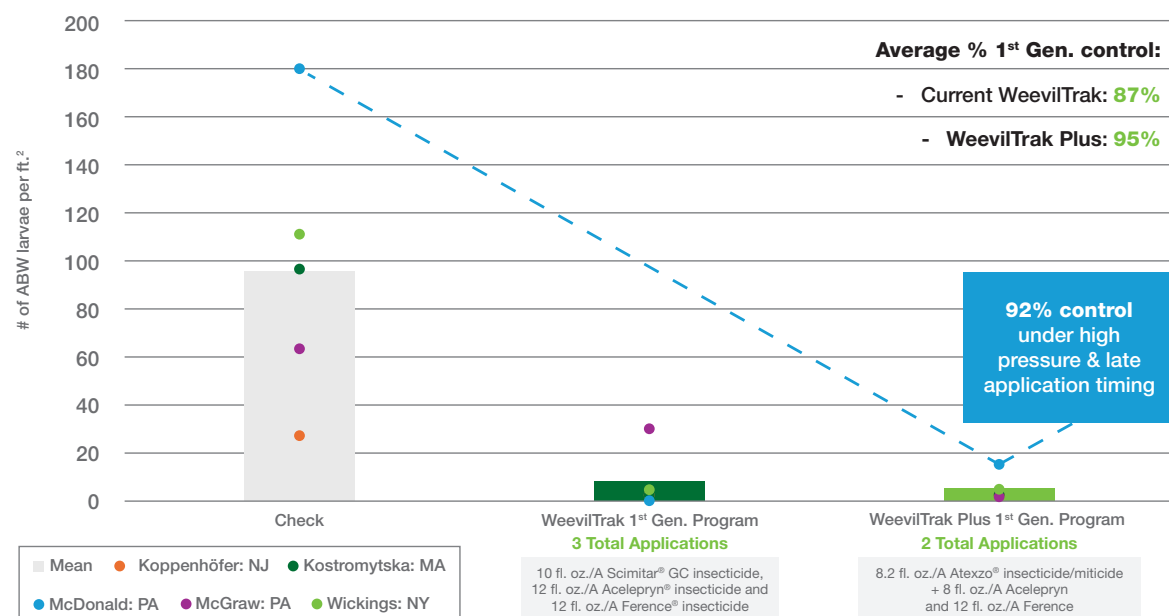

WeevilTrak Plus delivers:

- Enhanced efficacy
- Greater flexibility
- Fewer applications
- Resistance management
- Broader-spectrum control than an IGR-based program

The keys to successful ABW management:

- **Target overwintered populations** (adults and early first-generation larvae) for season long-success
- **Follow WeevilTrak Plus recommendations** for product timing to target multiple life stages
- **Continue scouting** and monitoring local plant phenological indicators including Growing Degree Day accumulations for site-specific conditions
- **Rotate modes of action** for resistance management
- **Review WeevilTrak Plus blogs** for local ABW insights from 15 independent researchers

NEW WeevilTrak Plus Program enhanced by Atexzo insecticide

Source: Data collected from multiple researchers across various states from April 16 - June 3, 2025.

Scimitar GC is a Restricted Use Pesticide.

WeevilTrak Plus Program and Guarantee

OVERWINTERING GENERATION ABW CONTROL

SUMMER GENERATION ABW CONTROL

	PHASE 1: Critical integrated control	PHASE 2: Larval control	PHASE 3: Complete asynchronous control	PHASE 4: Larval clean up (L1 - L5)
Timing	Forsythia full green (~seven days after peak adult activity)	<i>Rhododendron catawbiense</i> full bloom or Eastern Redbud full bloom	Late June - early July	Late July - early August
Application	Atexzo 8.2 fl. oz./A + Acelepryn 8-12 fl. oz./A  	Ference 12 fl. oz./A 	Atexzo 8.2 fl. oz./A 	Ference 12 fl. oz./A 
Watering-in	Water-in with 0.1" irrigation immediately after application	Water-in prior to mowing	Water-in with 0.1" irrigation immediately after application	Water-in prior to mowing
ABW target(s)	Overwintered adults and early-instar larvae (through L2 inside of stem)	L3 - L5 instars (outside of stem)	Adults and larvae	Asynchronous larvae
Additional pests controlled	Season-long grub , caterpillar and billbug control		Additional billbug and turf caterpillar control	Additional white grub , caterpillar and billbug control

Need ant and chinch bug control? Contact your Territory Manager for Acelepryn Xtra timing

Guaranteed season-long control of ABW, white grubs and turf caterpillars in the following states (assuming necessary state registrations): CT, DE, DC, IL, KY, MA, ME, MD, NC, NH, NJ, NY*, OH, PA, VA, VT, WV and RI.

- To qualify for the guarantee, you must be a registered WeevilTrak Plus user, following at least one course and making product applications at the rates stated above to qualify. Timing of product applications can be adjusted based on local conditions and the results of scouting at your specific course. To ensure optimum control, it is recommended you follow a secondary course and the WeevilTrak Plus blog for additional timing, scouting and detailed ABW information.
- If you do not achieve acceptable ABW control, or if unexpected turf damage from ABW occurs, contact your local Syngenta Territory Manager to review the performance of the WeevilTrak Plus Guarantee to confirm product recommendations and timing were followed, and that resulting damage is due to ABW feeding.
- All products must be purchased from a Syngenta Authorized Distributor/Retailer.
- Syngenta will provide replacement product but will not pay for any application costs for the rescue treatment.
- Determination by Syngenta as to whether less than acceptable control exists will be final.
- Syngenta reserves the right to modify or discontinue this Guarantee at any time.
