Innovative Technologies that Drive Turf Excellence

Platinum Partner Recognition – Syngenta is proud to be a GCSAA Platinum Partner, the only plant protection company at this level, underscoring our commitment to the golf industry.

Innovation Advantage – We leverage vast resources, research and breakthroughs from our global agriculture business to bring unique innovations to turf management.

Proven Science & Real-World Insights – Our solutions combine rigorous research with hands-on expertise to help you anticipate challenges, harness data and deliver consistent, high-quality playing conditions.

Performance Guarantees – Protect your turf with leading agronomic recommendations and guaranteed performance programs for key pests, developed by our technical experts and available year-round. Learn more at GreenTrust365.com/Guarantee.

More Than Products – A True Partnership – With Syngenta, you gain a dedicated partner focused on advancing turf excellence through technology, agronomic know-how and a relentless commitment to your course success.

GreenTrust® 365 Benefits – Participants at the 7% level or higher enjoy Yearlong Rebates, maximizing value while maintaining peak turf performance.

Fungicides

Action Brand Benefits

Acibenzolar-S-methyl stimulates the plant's natural defenses to protect against biotic and abiotic stressors including:

- Enhanced disease control
- Drought tolerance
- Heat tolerance
- Shade tolerance
- Salt mitigation
- Quicker recovery from stress (including aerification)

Secure Action Fungicide

- Enhanced control of dollar spot (up to 21 days) and bermudagrass leaf spot
- Inside-out protection
- Resistance management from two AIs with no known resistance

Daconil Action Fungicide

- Enhanced control of dollar spot, algae and anthracnose
- Inside-out protection
- Resistance management from two AIs with no known resistance

Heritage Action Fungicide

- Two AIs provide enhanced protection against abiotic stressors
- Offers root protection and improved root recovery when combined with a nematicide

Appear II Fungicide

- Provides a deep, natural green color while enhancing turf quality and stress tolerance
- Controls important diseases such as *Pythium*, and is ideal for use in agronomic programs with Daconil® Action™ or Secure® Action fungicides for increased control of anthracnose, summer decline and more

Ascernity Fungicide

- Combines SOLATENOL® SDHI technology and *difenoconazole*, the cooling DMI, to control key cool- and warm-season turf diseases including dollar spot, gray leaf spot, brown patch and anthracnose
- Provides excellent turf safety with no heat restrictions even in summer when disease pressure is high
- The industry standard for *Rhizoctonia* control
- Part of the GreenTrust® 365 Snow Mold Guarantee and the GreenTrust 365 Large Patch Guarantee

BannerMaxx II Fungicide

- Systemically controls more than 20 diseases, including dollar spot, leaf spot, patch diseases and snow mold

Briskway Fungicide

- Contains *azoxystrobin* and *difenoconazole*, the cooling DMI, which work together to control over 20 summer turf diseases
- Can be used in high heat and humidity on sensitive turf species without temperature restrictions or negative plant growth regulation (PGR) effects
- Now you can turn up your control with enhanced labeled rates for application flexibility
- Part of the GreenTrust 365 Fairy Ring Guarantee and the GreenTrust 365 Spring Dead Spot + Take-All Root Rot Guarantee

Concert II Fungicide

- Includes two active ingredients to help prevent more than 13 diseases, including snow mold
- Contains a multi-site mode of action to help delay resistance

Daconil Fungicide

- Powered by a multi-site contact mode of action to help delay or prevent resistance to single-site fungicides
- Controls a broad spectrum of diseases including dollar spot, brown patch, leaf spots, algae, melting out, anthracnose, rust, gray snow mold and more
- Daconil Action®, Daconil Ultrex®, Daconil Weatherstik® and Daconil Zn® Flowable formulations are available*

Headway Fungicide

- Offers excellent broad-spectrum disease control on cool- and warm-season turf species, including spring dead spot, take-all root rot, take-all patch, summer patch, leaf spot and fairy ring
- Combines two systemic active ingredients with different modes of action, providing an excellent rotation product in agronomic programs to help delay resistance

Heritage Fungicide

- Controls over 25 turf diseases including leaf spot, brown patch and more
- Offers extended control intervals of up to 28 days while improving overall turf quality
- Heritage®, Heritage Action, Heritage TL, Heritage WDG and Heritage G formulations are available*

*Benefits of these formulations may vary.

Instrata Fungicide

- Protects greens and tees against pink and gray snow mold and spring diseases such as anthracnose
- Contains three active ingredients and multiple modes of action for resistance management
- The industry-standard for snow mold control that is assured for 130 days under snow cover
- Part of the GreenTrust 365 Snow Mold Guarantee

Medallion SC Fungicide

- Quickly targets pathogen spores to prevent development of key diseases, including snow mold, anthracnose, bermudagrass leaf spot and bentgrass dead spot
- Contact fungicide that protects on the leaf surface, in the thatch and at the soil surface to quickly reduce disease infection

Posterity Fungicide

- Provides up to 28 days of dollar spot control and delivers robust, consistent spring dead spot control
- Contains ADEPIDYN® technology and is ideal for use in agronomic programs with Secure Action and Daconil Action for resistance management and broader-spectrum control

Posterity Forte Fungicide

- Offers increased spring dead spot control, excellent control of dollar spot for up to 28 days, plus leaf spot, brown patch and take-all root rot control
- Contains three leading active ingredients in different FRAC groups, including ADEPIDYN technology, for enhanced control, spectrum and resistance management
- Part of the GreenTrust 365 Spring Dead Spot + Take-All Root Rot Guarantee

PosterityXT Fungicide

- Provides up to 28 days of control of more than 20 diseases including brown patch, summer patch and dollar spot
- Contains three leading active ingredients in different FRAC groups, including ADEPIDYN technology, for enhanced control, spectrum and resistance management
- Part of the GreenTrust 365 Snow Mold Guarantee, GreenTrust 365 Fairy Ring Guarantee and the GreenTrust 365 Large Patch Guarantee

Secure Fungicide

- Offers a multi-site contact active ingredient that aids in resistance management
- Controls dollar spot and 10 additional turf diseases
- Secure Action formulation also available

SubdueMaxx Fungicide

- Provides contact and systemic protection against *Pythium* blight, *Pythium* damping-off and yellow tuft (downy mildew)
- An excellent tank-mix partner with Appear® II and Daconil Action fungicides in agronomic programs because of its efficacy and long residual of up to 21 days

Velista Fungicide

- Broad-spectrum SDHI that provides excellent anthracnose control on golf course turf
- Also protects against dollar spot, brown patch, spring dead spot, rapid blight, fairy ring and more
- Foundation of the GreenTrust 365 Fairy Ring Guarantee

Nematicides

Divanem Nematicide

- Offers broad-spectrum control of root-knot, spiral, sting, stubby root and lance nematodes via broadcast or spot treatment applications as well as resistance management for sting and root-knot species.
- Also available in a spot treatment rate to control *Anguina* nematodes
- Ideal for use with Briskway® and Velista® fungicides to help manage nematodes, diseases and abiotic stressors and to prevent the onset of resistance

Trefinti Nematicide/Fungicide

- Controls a broad range of plant-parasitic nematodes including lance, sting, root-knot and *Anguina*
- Part of a resistance management program when rotated with Divanem
- Protects against soilborne diseases including spring dead spot, take-all root rot and mini ring
- Helps increase root growth and promotes healthier turf through disease and nematode control

*Benefits of these formulations may vary.

Divanem is a Restricted Use Pesticide.

syngenta®

Plant Growth Regulators

PrimoMaxx® Plant growth regulator

- Foliar absorbed to slow turf growth and promote denser, healthier turf that is better able to withstand stress including heat, drought, disease and traffic
- Boosts course aesthetics, enhances playability, improves pre-stress conditioning and conserves valuable resources like labor and equipment

Trimmit® 2SC Plant growth regulator

- Primarily absorbed through roots, so growth regulation is delayed, making it ideal for use with Primo Maxx® plant growth regulator for long-term growth regulation
- Sensitivity of *Poa annua* to Trimmit® 2SC plant growth regulator allows desirable turfgrass to crowd out and out-compete regulated *Poa annua*
- Suppression or control of annual bluegrass (*Poa annua)* in overseeded or non-overseeded turf

Herbicides

Barricade® 4FL Herbicide

- Guaranteed to provide long-lasting, preemergent weed control with one application
- Labeled to control more than 30 weeds, including summer and winter annuals
- Barricade® 65 WG and Barricade on-fertilizer formulations are also available*

Fusilade® II Herbicide

- Offers selective post-emergent control of many perennial and annual grassy weeds in a variety of turf and landscape areas
- Allows for higher rates to be used for non-selective control of grasses during renovations
- Removes bermudagrass from zoysiagrass and St. Augustinegrass with unparalleled turf safety when tank mixed with Recognition® herbicide

Manuscript® Herbicide

- Controls mature, grassy weeds, including crabgrass, tropical signalgrass and more
- Provides an option for controlling ryegrass in *Poa annua* or creeping bentgrass turf, as well as foxtails, ryegrass, tall fescue and barnyardgrass in native and low-maintenance fine fescue turf
- Packaged with Adigor™ surfactant from Syngenta, which is custom-built for use with Manuscript® herbicide to provide greater application reliability and outstanding turf safety

Monument® 75WG Herbicide

- Provides post-emergent control of all major sedges and more than 40 other weeds in bermudagrass and zoysiagrass
- Removes cool-season grasses from certain established warm-season turf to help simplify overseeding transitions

Pennant Magnum® Herbicide

- Prevents germination of more than 20 weeds, including goosegrass, yellow nutsedge, smooth crabgrass and large crabgrass
- Can be used in a wide range of warm-season turfgrasses, including bermudagrass, zoysiagrass, bahiagrass, centipedegrass and St. Augustinegrass

Recognition® Herbicide

- Controls 40+ broadleaf weeds including all major sedges, dollarweed, clover and more
- Safens certain other herbicides when tank mixed for faster, broader-spectrum control in St. Augustinegrass and zoysiagrass
- Selectively removes bermudagrass from zoysiagrass and St. Augustinegrass with unparalleled turf safety when tank mixed with Fusilade® II herbicide

Reward® Landscape and aquatic herbicide

- Ideal for non-selective weed control and burn-down in turf and landscapes including as a trim and edge tool
- Offers pre and post-emergent control of more than 46 broadleaf weed and grass species, including crabgrass, ground ivy, yellow foxtail, yellow nutsedge and unwanted bentgrass

Tenacity® Herbicide

- In Florida, provides post-emergent control of goosegrass in bermudagrass when tank mixed with simazine and Pennant Magnum® herbicides
- Can be used at seeding to reduce weed competition so new turf can establish faster
- Offers pre- and post-emergence control of broadleaf, grass and sedge weeds including crabgrass, creeping bentgrass, ground ivy, yellow foxtail, yellow nutsedge and nimblewill

*Benefits of these formulations may vary.

Insecticides

Acelepryn® Insecticide

- Offers season-long control of grubs and turf caterpillars with a single application as well as key pests like Japanese beetles and foliar-feeding caterpillars on landscape ornamentals
- Acelepryn® insecticide on-fertilizer formulation is also available*

Acelepryn® Xtra Insecticide

- Two modes of action provide enhanced control, a wider application window and broader-spectrum insect control than the original Acelepryn
- Season-long control of grubs, billbugs and caterpillars with just one application, including early curative grub control
- Additional control of turfgrass ants
- Enhanced chinch bug control, including up to three months of southern chinch bug control

Advion® Fire ant bait

- Fast-acting for total colony control within 24-72 hours
- Can be applied as a broadcast or mound treatment to control all fire ant life stages
- Part of the Advion® Fire Ant Bait Guarantee

Advion® Insect granule

- Highly attractive bait quickly controls mole crickets, cockroaches, earwigs, crickets and more
- Features a broad range of application use sites with minimal impact on non-target organisms

Advion® Insect Granular bait

- Its palatable, highly attractive formulation results in greater bait consumption among target pests
- Its MetaActive™ effect helps provide targeted, thorough control
- Labeled for common pests like ants, cockroaches, crickets and silverfish
- A 1-lb. shaker bottle is ideal for use as a perimeter band or spot treatments, while the 12 lb. bag helps meet higher-volume needs

Insecticide/Fungicide

Caravan® G Insecticide/fungicide

- Combines a powerful insecticide and fungicide with a single application
- Controls grubs (including early curative), chinch bugs, sod webworms and more
- Controls 20+ diseases including brown patch, red thread and leaf spot

Atexzo® Insecticide/Miticide

- A novel mode of action and active ingredient controls annual bluegrass weevil adults and all larval stages, mole crickets, bermudagrass mites, turf caterpillars, billbugs, European crane fly and more
- No known cross-resistance and an excellent tank mix partner with Acelepryn brands
- Long residual control with contact and ingestion activity for wide application window

Ference® Insecticide

- Part of WeevilTrak Plus to control all larval stages of ABW, which improves control of asynchronous populations
- Offers a longer residual control than competitive products
- Also controls billbugs, European crane flies, white grubs, turf caterpillars and suppresses chinch bugs

Meridian® 25WG Insecticide

- Provides up to 90 days of southern chinch bug control in St. Augustinegrass
- Offers preventive and curative control of a variety of beetle larvae, including Asiatic garden beetles, Japanese beetles, May and June beetles, European crane fly and chafers
- Preventive applications maintain efficacy in the soil even if there is no rain or irrigation for up to seven days after application

Provaunt® WDG Insecticide

- Offers excellent mole cricket control
- Also controls European crane flies and turf caterpillars (including armyworms, cutworms and sod webworms)

Scimitar® GC Insecticide

- Provides time-released control of ants, adult beetles, crickets, chiggers, fleas and ticks

*Benefits of these formulations may vary.
Scimitar GC is a Restricted Use Pesticide.

Digital Tools to Take Your Course to the Next Level

In addition to its product portfolio, Syngenta offers many tools and programs on **GreenCastOnline.com**. **Sign up for alerts** and receive relevant information to help you improve your turf all season.

Spiio™ GCX soil sensor
Track key soil data including temperature, moisture and salinity to gain site-specific insights on below surface conditions. Data seamlessly integrates into the GreenCast Connect digital platform.

GreenCastConnect.com

Cooling Degree Day alerts
Measure the accumulation of cooling below a set air temperature threshold to help you time fall herbicide applications to control dallisgrass.

GreenCastOnline.com/CoolingDegreeDays

Dollar Spot alerts
Notifications about dollar spot risk in your area.

GreenCastOnline.com/DollarSpot

GreenTrust 365 program
Maximize your purchasing power with yearlong rebates, pallet solutions, product guarantees, rebate calculators and more.

GreenTrust365.com/Golf

GreenCast Advisory emails
Tips, updates and news from Syngenta technical experts to help you stay ahead of the game.

GreenCastOnline.com/GreenCastAdvisories

GreenCast® Connect
Turf conditions change fast. Stay ahead with GreenCast Connect, an all-in-one app with customized weather, pest alerts and growth insights for more confident decision making, resource optimization and more.

GreenCastConnect.com

Aero™ GCX microclimate sensor
A microclimate sensor that evaluates precise environmental conditions across your property and is integrated with the GreenCast Connect Mobile App.

GreenCastConnect.com

Growing Degree Day model
Monitors heat accumulation and weather patterns in your area to help refine product application timing.

GreenCastOnline.com/GrowingDegreeDays

Soil Temperature maps
Automated turf pest alerts based on local soil temperatures.

GreenCastOnline.com/SoilTemperature

Turfgrass Disease Identification guide
Use our online guide to help diagnose key turfgrass diseases.

GreenCastOnline.com/DiseaseGuide

WeevilTrak℠ Plus program
Tracking and simplified product recommendations featuring Atexzo insecticide for guaranteed ABW control, plus insights via blog posts from independent researchers.

GreenCastOnline.com/WeevilTrakPlus

Turf Agronomic Programs

Syngenta offers more than 60 agronomic programs to help superintendents plan appropriately for the season ahead. Each program has been thoroughly researched and tested by Syngenta technical experts to provide:

- Comprehensive, season-long pest management
- Proper product rotation to help manage resistance
- Focus on preventive treatments to help save time and resources
- Turf that is prepared for periods of heavy stress to help maintain aesthetics and playability
- Accurate product calculations based on course acreage
