

Contend® fungicide is supported by the Snow Mold Assurance to provide up to 110 days of pink and gray snow mold control on golf course tees and fairways. This combination of separately registered products, Contend A and Contend B, brings the power of **four active ingredients in three FRAC codes** for exceptional performance.

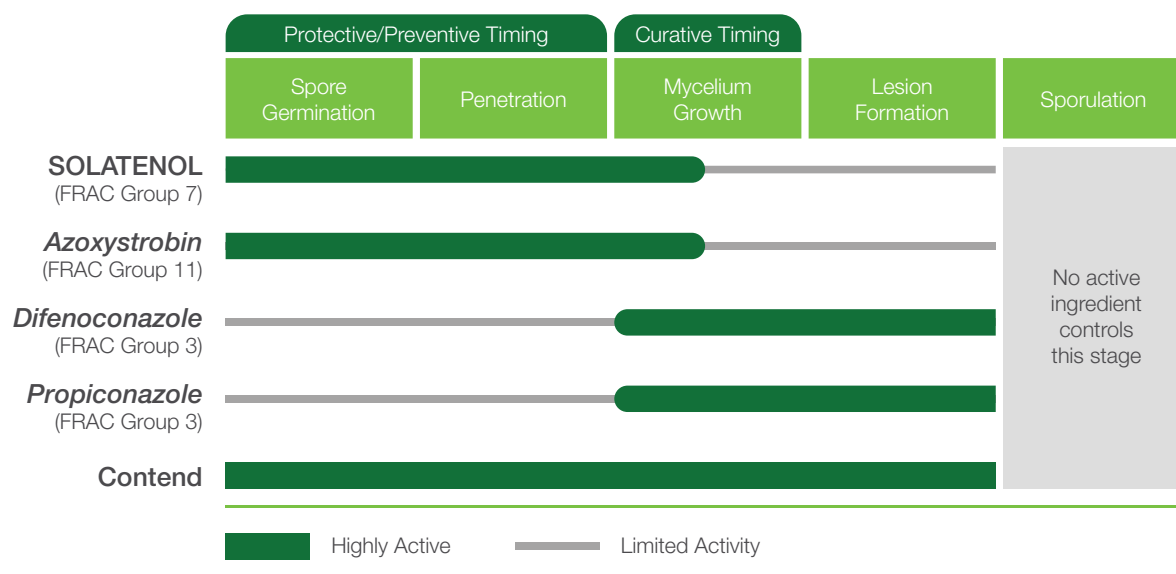

## CONFIDENCE IN CONTROL

- Contains four active ingredients in three FRAC codes including *azoxystrobin*, *propiconazole*, *difenoconazole* and SOLATENOL® technology (*benzovindiflupyr*)
- Solatenol technology is a third generation SDHI that strongly binds to the plant's waxy layer to penetrate the leaf tissue. Its translaminar activity and extremely high potency deliver long-lasting disease control superintendents have come to expect.
- The formulation is non-volatile, photostable and persistent in the plant throughout winter
- Controls pink and gray snow mold for up to 110 days
- Available as part of the Contend Winter Solution pallet with Instrata® fungicide
- Included in the GreenTrust® 365 Snow Mold Assurance Program, which features proven application recommendations and performance guarantees for managing snow mold

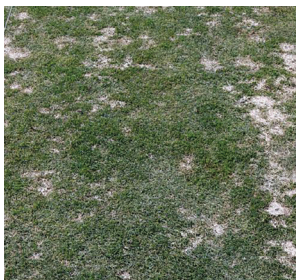

## APPLICATION TIMING AND ACTIVITY

The four active ingredients work together and move throughout the plant to help control snow mold at multiple stages of disease development.
